

Blizzards

By: Owen, Ian, and Eli

What's a Blizzard

A blizzard is a strong snowstorm with strong winds and does lots of damage to many things but more on that later.

safety Precautions

Always wear a bright coat and lots of layers of clothes and stay in your car or house.

Where a blizzard is found?

A blizzard is found in Canada, America, Russia and other places too but mostly cold areas.

Damage

Blizzards can cause all kinds of damage

- like knocking out power
- destroying your car
- and friends and family.

How does a blizzard form?

- To be a blizzard a snow storm must have fast winds going faster than 35mph
- It has to last 3 to 4 hours
